Logger Safety Initiative: Employer Safety Program Application	21

Logger Safety Initiative Background

The Logging Safety Initiative (LSI) began in 2012 when industry leaders from the Washington Contract Logger Association (WCLA), the Washington Forest Protection Association (WFPA), and Public Lands Commissioner Peter Goldmark began meeting with L&I to discuss the workers' compensation rates, trends and injury statistics for non-mechanized or manual logging operations (5001).

In recent years, risk class 5001 has experienced catastrophic and costly claims, but fewer hours have been reported by employers – a situation that has more than doubled the base rate over the past five years. Trends indicate the rates are likely to increase further in the future, due to the number of severe injuries in the past few years. During initial meetings, all parties agreed that too many injuries are occurring and logging companies are facing unaffordable workers' compensation premium rates. Action to improve logging safety is an urgent need.

The taskforce is focused on finding ways to improve the safety performance of the industry so that both the frequency and severity of injuries can be reduced. L&I agreed to work with industry representatives to organize a Logger Safety Taskforce that would develop a Washington State Logger Safety Initiative.

In January 2013, a letter confirming their commitment to providing the time and resources to build a successful safety program was finalized and signed by all parties. Governor Jay Inslee signed the commitment letter on May 21, 2013.

The Logger Safety Taskforce was initiated in March 2013, and includes both a policy and technical committee. Ed Bryant of ENB Logging & Construction and Norm Schaaf of Merrill & Ring, are policy committee co-chairs. Other members include logging company representatives, WCLA, forest landowners, WFPA, L&I and the Washington State Department of Natural Resources.

The Logger Safety Initiative was supported by the passage of [Engrossed Substitute Senate Bill \(ESSB 5744\)](#) by the Washington State Legislature in April 2013. It was signed by Governor Inslee in May. This legislation acknowledges the need for the Logger Safety Taskforce's work, recognizing that workers in manual logging (especially younger workers new to the industry) have more frequent and more severe injuries than in other industries.

Washington State's Logger Safety Initiative Accord

Goal: The Washington State Logger Safety Initiative, in partnership with private landowners, the Washington Contract Loggers Association, logging companies, the Washington Department of Natural Resources and the Washington Department of Labor & Industries, will focus on ways to promote occupational safety, reduce the frequency and severity of workplace injuries and fatalities, increase proper reporting, and explore options for reducing costs, to create a culture of safety that is pervasive throughout the logging industry in Washington State.

Objectives:

- Create a Logger Safety program that establishes sector-wide standards for worker training, performance and supervision.
- Establish a certification process for individual company safety programs to ensure compliance with sector-wide standards and review progress of logging operations through mandatory performance based audits.
- To the extent practical, create an environment of shared learning that fosters honesty and rewards self-reporting of incidents.

Core Beliefs:

- We believe that all fatalities and injuries are preventable.
- We believe in a culture where the health and safety of all workers is the highest priority.
- We believe that excellence in health and safety is possible and is important to our long-term success.

Shared Responsibilities:

- As an industry, we must embrace a culture of safety. We are collectively and individually responsible for the safety of all workers and all worksites.
- As an individual, we must assume responsibility for complying with all applicable safety rules, procedures and practices, refusing to perform unsafe work, and taking collective responsibility for the unsafe conduct of others.
- As an employer and landowner, we must take a leadership role in ensuring worker health and safety is our number one priority and assuring accountability for safety on the worksite.

Recognition of Safety Performance & Practices:

- The commitment to health and safety is to all workers, not just direct employees. When engaging contractors, subcontractors and other to provide services, the selection process and administration of contracts will include recognition and support of good safety performance and practices.
- Employers will recognize and support the safety performance of their employees.
- All employers and landowners will give weight to the safety record and current practices of companies in the awarding of contracts.

Continual Improvement: We are committed to the on-going improvement of our practices and support efforts to develop and implement new methods, procedures and technologies that have the potential to improve the health and safety of our industry.

LSI Employer Safety Program Requirements

The LSI Taskforce believes it is critical that the safety culture in Washington's logging industry changes. To do this, workplace safety must be treated as a first priority and a shared responsibility throughout the industry. Workers must be trained and encouraged to work safely and there must be measures in place that support safety in the woods. To this end, an Employer Logger Safety program for manual logging operations (risk classification 5001) has been developed by the LSI Taskforce. The program establishes sector-wide standards for worker training, performance and supervisor and reviews progress of logging operations through mandatory performance-based audits and Washington State Division of Occupational Safety and Health consultation services.

Below are the requirements of the LSI Employer Logger Safety Program:

1. Complete the LSI Employer Logger Safety Program Application
2. Implement an approved LSI accident prevention program and training that is effective in practice.
3. Be in compliance with applicable safety and health standards administered by Labor & Industries Division of Occupational Safety & Health (DOSH). Account must be "in good standing" as outlined in WAC 296-17-31004(4).
4. Participate in a L&I technical premium audit and correct findings.
5. Participate in a DOSH comprehensive consultation of all manual logging operations, including a complete safety and health program review and correct all identified safety and health hazards.
6. Pass an independent third party audit to verification of the LSI Logger Safety Program requirements.
7. Submit monthly supplemental reports for hours worked in risk classification 5001.
8. Annually attend one of the LSI Employer Logger Safety Program training sessions. If the employer is delegating supervision and or training responsibilities, those individuals must also attend.
9. Accurately report worker hours in the appropriate risk classifications.
10. To the extent possible, within 48 hours of starting work at a new manual logging/cutting site, notify the Dept. of Labor & Industries and provide the following details: site location from emergency medical plan, logging systems and cutting method(s), and expected duration of the job.

The Taskforce subcommittee developed LSI model accident prevention programs for cutting operations, tower, and other mechanized logging operations (model APPs can be found online at www.loggersafety.org) that contain all LSI certification requirements for safe work practices, worker training, and supervision specific to the hazards involved. Detailed curriculum has been developed for both the logging operations as well as cutters and is available in the model APPs. In addition, there are specific training and supervision requirements for inexperienced cutters before they can work independently.

Below are the requirements for worker training and supervision:

Supervision and site inspection for manual logging/cutting operations

1. The employer must designate, a supervisor(s) for each jobsite who is both competent and qualified and has the authority to:
 - Supervise all personnel at the site.
 - Enforce the company's safety and health program.
 - Verify that all current and new employees:
 - Can safely perform assigned work tasks.
 - Have received adequate job safety instruction and training.
2. The employer must implement a procedure for monthly safety inspections of all logging/cutting sites to identify and correct unsafe working conditions and unsafe work practices.
 - The safety inspections must be conducted by a competent and qualified person.
 - The safety inspections must include a review of the safety performance of each employee.
 - Safety inspections must be documented
 - Documentation must include:
 - Person who conducted the inspection and their signature
 - Date of the inspection
 - Employees at the worksite
 - Identified hazards
 - The employer must document what actions were taken to correct identified hazards.

Training – General requirements

1. The employer must ensure that all workers on a logging/cutting site have received safety orientation and training specific to their job.
2. The employer must provide a worker with refresher training if a workplace observation, jobsite inspection or report from another employee reveals that a worker is not performing work tasks safely.
3. The employer must closely supervise each employee who is receiving job safety and health instruction and training.

4. The employer must require employees to demonstrate the ability to safely perform their work task before permitting them to work independently.
5. The employer must document training per the requirements of the Safety Standards for Logging Operations WAC 296-54.
6. The employer must ensure that training is provided by persons who are competent and qualified.
7. The employer must ensure that training is conducted in a language and manner that the worker will understand.
8. The employer must ensure that their trainers understand their roles and responsibilities including:
 - a. Determine the experience level of the trainees;
 - b. Serve as a positive role model for the trainees;
 - c. Provide training that at a minimum meets the training curriculum of the Logger Safety Program;
 - d. Effectively communicate the training curriculum;
 - e. Effectively demonstrate proper work practices as required in the training curriculum;
 - f. Observe and verify that the trainee can perform the proper work practices as required in the training curriculum.

Training – Cable logging operations

1. The employer must ensure that all employees receive the training as specified in the Logger Safety Program Training Curriculum for Cable Logging Operations. (See curriculum in the LSI APPs).

Training – Cutters

1. A worker may not work as a cutter in a logging operation unless;
 - a. The worker receives training for cutting that meets the training requirements in section (2), and an experienced cutter certifies in writing that the trainee has successfully completed the training requirements, or
 - b. Meets the requirements in section (4) and an experienced cutter certifies in writing that the cutter's experience satisfies training requirements.

Note: This section does not apply to workers who occasionally fall trees such as the falling of guyline trees or tail trees, but the employer must meet the training requirements in the Logging APP pages 64-67.

“New cutter”: cutter with less than 150 working days of experience as a timber cutter.

2. New cutter training must include the following:

(a) Receive basic training in falling and bucking by working one-on-one with an experienced cutter (trainer) until the trainer determines that the trainee cutter is qualified to work independently under close supervision, but must be a minimum of 30 working days.

(i) Basic training must include completion of the Cutter Training Curriculum (see attached curriculum)

(b) After completion of basic training under paragraph (a), a trainee cutter must be evaluated on a weekly basis by an experienced cutter for a minimum period of 120 working days.

(c) A training log for the basic training and supervision period must be maintained by both the trainer and the trainee.

(i) The training logs must include the dates of training/supervision, and the name and signature of both the trainer and trainee.

(d) If a new cutter's employment ends prior to completing the basic training and or the supervision period, a subsequent employer may accept prior training that is properly documented on the training logs. If accepted by a subsequent employer, the trainee would only need to complete the remaining minimum training requirements.

3. If, at the end of the training and supervision period, the trainee's cutting is consistent with the safe work practices in the Cutter Training Curriculum, the experienced cutter will certify in writing that the trainee has successfully completed the training requirements.

(a) A copy of the document used to certify training, must be maintained by the employer and a copy must be provided to the cutter.

(i) A copy of the document used to certify that the cutter has satisfied training requirements must be maintained by the employer and a copy must be provided to the cutter. The documents must include: cutter's name, experienced cutters name, date(s) of evaluation and signature of both the cutter and evaluator

4. Subsection (2) does not apply to a cutter who satisfies all of the following requirements:

(a) A cutter has performed falling duties regularly for at least 150 working days before the evaluation under paragraph (b) of this subsection takes place; and

(b) An experienced cutter evaluates the cutter's work practices and determines that the cutter is performing the job in a manner that is consistent with the safe work practices in the Cutter Training Curriculum. The experienced cutter may certify in writing that the cutter's experience satisfies training requirements.

(i) A copy of the document used to certify that the cutter has satisfied training requirements must be maintained by the employer and a copy must be provided to the cutter. The documents must include: cutter's name, experienced cutters name, date(s) of evaluation and signature of both the cutter and evaluator (experienced cutter).

Logger Safety Initiative Checklist

☐ Step 1: Registration

Complete the Logger Safety Initiative: Employer Safety Program Application and submit to:

Logger Safety Initiative
P.O. Box 44608
Olympia, WA 98504-4608

You can also send a scanned copy to loggersafety@lni.wa.gov or fax to 360-902-5438.

☐ Step 2: Memorandum of Participation

After we receive your application, you will be contacted by the LSI Program Manager to sign a memorandum of participation. The memorandum of participation is an agreement that clarifies the responsibilities for the employer and L&I in regards to the rate incentive.

After the memorandum of participation is signed, you'll receive a new rate notice with your new discounted rate.

☐ Step 3: Accident Prevention Program

Begin to implement your LSI accident prevention program and training program. Model LSI Accident Prevention Programs are available online at www.loggersafety.org or you can contact the LSI Program Office to obtain a disc with electronic versions. Limited hard copies are also available.

If you need assistance with implementing your safety program, contact the LSI Program Office at 360-902-5008.

☐ Step 4: Jobsite Notification

To the extent possible, within 48 hours of starting work at a new manual logging/cutting site, notify the Dept. of Labor & Industries and provide the following details: site location from emergency medical plan, logging systems and cutting method(s), and expected duration of the job.

You can submit this information via:

Online Form: www.loggersafety.org
Email: LoggerSafety@lni.wa.gov
Fax: 360-902-5438

Checklist continued on next page...

☐ **Step 5: Monthly Supplemental Forms**

Submit monthly supplemental reports for hours worked in risk classification 5001 (see page 12 for more details) via mail or fax.

Department of Labor & Industries
Employer Services
PO BOX 44168
Olympia, WA 98504-4168

Fax: 360-902-6787

Copies of the form can be found at www.loggersafety.org or by contacting the LSI Program Office at 360-902-5008.

☐ **Step 6: L&I Technical Premium Audit**

After we receive your signed Memorandum of Participation, you will be contacted by L&I to schedule your premium audit. If you have questions, you can call Technical Audit at 360-902-5443 or contact the LSI Program Office at 360-902-5008.

☐ **Step 7: DOSH Comprehensive Consultation**

After we receive your signed Memorandum of Participation, you will be contacted by L&I to schedule your DOSH Comprehensive Consultation. L&I's logging safety rules and resources page is available by visiting the website www.loggersafety.org. If you have questions, you can call DOSH Consultation at 360-902-5317 or contact the LSI Program Office at 360-902-5008.

When you are contacted to schedule your consultation, consider the following:

- Do you want a consultation early to help you identify areas where you could improve your current safety program?
- Do you need to schedule the consultation out several months in order to ensure adequate time to implement new training and requirements?

☐ **Step 8: Independent LSI Safety Audit**

A minimum of six months in the LSI program is required prior to scheduling your independent third party audit to verification of the LSI Logger Safety Program requirements. Once you have completed the L&I Technical Premium Audit, DOSH Comprehensive Consultation and have a history showing compliance with the new reporting requirements, contact the LSI Program Office at 360-902-5008 regarding scheduling your independent third party audit.

The LSI taskforce is still working on selecting a vendor to perform the independent third party audits. More information will be available on the website www.loggersafety.org as well as via listserv and by contacting the LSI Program Office directly.

L&I Technical Premium Audit

The LSI Taskforce recognized that when an individual business in the logging industry underpays its premium, it drives up workers' compensation rates for all logging businesses in Washington State. To help address these concerns, audits in the industry are being conducted to help make sure everyone in the manual logging industry group is reporting correctly, so that rates can be as low as possible for everyone, and creating a level playing field.

As a member of the LSI Program, you will participate in a technical premium audit which will be limited to a six-month period review of your records. If there are findings, we will work to minimize any late payment penalties and interest costs and, if needed, help you setup a payment plan.

If you've had a premium audit during in the last 12-months you do not need to have an additional audit.

What can I expect from an L&I audit?

We will meet with you to review your businesses:

- Payroll records
- Employee time records
- Records showing you own the business
- Bank records
- Invoices
- Tax records
- Contracts

What do L&I auditors look for?

In general, the auditors check to make sure you are:

- Assigned the correct risk classification
- Reporting in the correct classification and therefore paying the correct rate
- Reporting all covered workers for workers' compensation (Industrial Insurance) purposes
- Maintaining appropriate records

Jobsite Notification

To the extent possible, within 48 hours of starting work at a new manual logging/cutting site, notify the Dept. of Labor & Industries and provide the following details: site location from emergency medical plan, logging systems and cutting method(s), and expected duration of the job.

You can submit this information via mail or:

Online Form: www.loggersafety.org
Email: LoggerSafety@lni.wa.gov

Logger Safety Initiative Jobsite Notification

To the extent possible, within 48 hours of work beginning at a new logging/cutting site notify the Department of Labor and Industries and provide the following details for non-mechanized (5001) work:

(*required fields)

- *Today's Date:
- *Name of Owner/Landowner (DBA):
- *Unified Business Identification (UBI):
- *Contact person and telephone number:
- Forest Practices Application/Notification #:

• Contact information for the contractor, subcontractor/independent contractor hired:
(Only report contractors who perform work in risk classification 5001. Landowners are only required to report Non-LSI contractors hired)

Name:
Address:
Telephone Number:

(Site location from emergency medical plan)

- *Township, range, and section numbers or GPS coordinates;
- *Direction by road to site;
- *Logging system and cutting methods being used;
- *Expected job start:
- *Expected job completion date:
- Estimated number of acres:

You can complete this information online or print and submit a completed form to either loggersafety@lni.wa.gov or mail to Logger Safety Initiative, P. O. Box 44608, Olympia, WA 98504-4169

SAMPLE

Supplemental Monthly Reporting

LSI employers are required to submit monthly supplemental reports for hours worked in risk classification 5001. Supplemental reports should be submitted even if reporting zero hours.

Supplemental reports do not replace L&I quarterly reports or any other required forms (i.e. Mechanized Logging supplemental quarterly form, Forest Protection Supplemental form, etc); employers are still required to complete and submit quarterly reports. The supplemental reports are a requirement for the voluntary LSI program but not a reporting requirement of the department.

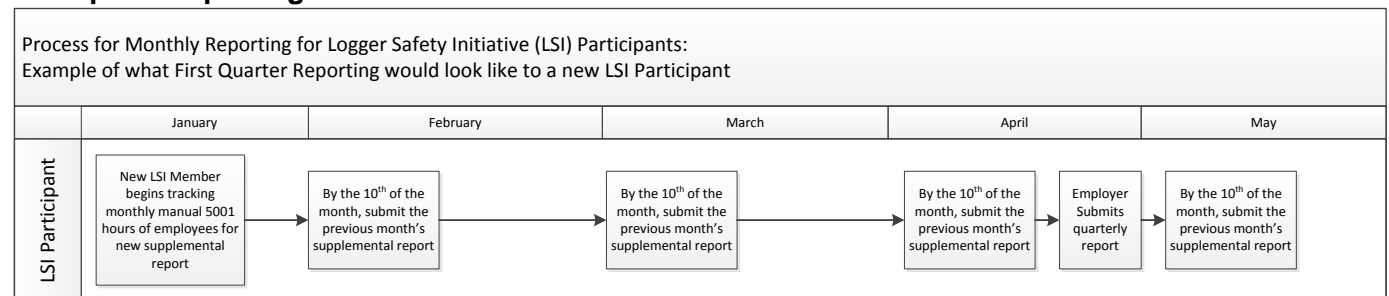

Forms can be submitted monthly by mail or fax:

Department of Labor & Industries
Employer Services
PO BOX 44168
Olympia, WA 98504-4168

Fax: 360-902-6787

Forms are available online at www.loggersafety.org or by contacting the LSI Program Office at 360-902-5008 or loggersafety@lni.wa.gov.

Program Requirements – Example Timeline

Below is an example timeline for an employer that registers for LSI during December 2013. As soon as an employer signs-up, they can begin implementing the new safety program and sign-up for the L&I Technical Premium Audit and DOSH Comprehensive Consultation.

Re-Certification – Example Timelines

The Logger Safety Initiative program is a three year certification program. Below is an example timeline of the three year program requirements. More details regarding recertification will be available after initial certification.

LSI Rate Incentive

Employers who participate in the LSI Employer Logger Safety Program will be eligible for a rate reduction of up to 20 percent. The premium discount is applied to the base rate before your experience factor is applied. A new rate notice will be sent to you after you join the program.

Employers will sign a LSI Memorandum of Participation at each new tier which has specific detailed requirements that must be met to be considered in good standing of LSI and eligible for the premium discount.

For employers that register between December 2013 and December 2014, the department will allow them to enter the program at the Tier 2 discount of 10 percent. Employers must still meet the terms of Tier 1 and Tier 2 before moving onto Tier 3.

Tier Level & Rate Incentive	How it Works
Tier1: Sign-up & Reporting Requirements (5% discount)	Employer agrees to the following criteria: <ul style="list-style-type: none">• Complete registration and commitment letter.• Report to Department of Safety and Health (DOSH) when starting work at new logging/cutting sites.• Submit monthly LSI manual logging supplemental reports regarding employee hours and job duties.• Begin activities to prepare for a third-party audit:• Implement the Employer Logging Safety Program (LSI accident prevention program and training).• Schedule L&I Premium Technical Audit.• Schedule L&I DOSH Comprehensive consultation.
Tier 2: Premium & Safety Consultation (additional 5% discount; total 10% with combined Tier 1 & Tier 2)	LSI employer demonstrates the following: <ul style="list-style-type: none">• Complete the L&I Premium Technical Audit and L&I workers compensation account is in good standing.• Complete the L&I DOSH comprehensive consultation and correct all finding.• History of reporting worksite location information.• Monthly supplemental reports (including zero hour reports) submitted since initial sign-up.• Status report re: implementing LSI employer safety program (LSI accident prevention program and training).
Tier 3: Third-Party Safety Audit (additional 10% discount; total 20% with combined Tier 1, Tier 2 and Tier 3 discounts)	Employer passes an independent third-party audit achieves LSI certification.
Tier 4: Performance Based (TBD)	Tier 4 will be determined through ongoing collaboration- with the logger safety Initiative Task Force.

LSI Rate Incentive Examples

Employers will receive the discount in the quarter following the quarter their application was received. Discounts cannot be applied mid-quarter, for example, if an application is received during quarter one, they would receive the discount beginning in quarter two.

Enrollment	Discount Applies to Quarter Starting
Dec. 1-31, 2013	January 1, 2014 (filed in April 2014)
March 1-31, 2014	April 1, 2014 (filed in July 2014)
June 1-30, 2014	July 1, 2014 (filed in October 2014)
Sept. 1-30, 2014	October 1, 2014 (filed in December 2014)
Dec. 1-31, 2014	January 1, 2015 (filed in April 2015)

Example 1: ABC Logging Company registers for LSI December 16, 2013. They receive a new rate notice with a discounted rate effective January 1, 2014. When they file their first quarter premiums in April 2014, they will file using the Tier 1 / Tier 2 discounted rate of 10 percent for January, February and March 2014.

Example 2: Safe Logging Company registers for LSI February 11, 2014. They will receive a new rate notice with a discounted rate effective April 1, 2014. When they file their second quarter premiums in July 2014, they will file using the Tier 1 / Tier 2 discounted rate of 10 percent for April, May and June 2014.

Example 3: New Logging Company registers for LSI January 10, 2015. They will receive a new rate notice with a discounted rate effective April 1, 2015. When they file their second quarter premiums in July 2014, they will file using the Tier 1 discounted rate of 5 percent for April, May and June 2015.

LSI Resources

There are resources available to help employers understand the requirements of the program and prepare for the certification process. Information is available online at www.loggersafety.org or by contacting one of the individuals listed below:

Organization	Contact	Phone	Email
Logger Safety Initiative Program Office PO BOX 44608 Olympia, WA 98504-4608	Devin Proctor	360-902-5008	LoggerSafety@lni.wa.gov
